

Capacity words

litres= l 	millilitres=ml	decilitres=dl
thousand=1,000	full 	empty 
liquid 	nearly full	nearly empty
container 	measuring jug 	spoon 
half full 	half empty 	estimate ???
measure 	Volume (see below)	

What is Capacity?

Capacity is the amount of liquid a container can hold. Capacity is the volume of a container given in terms of measuring liquid. Capacity means how much something can hold and words that describe it are: millilitres, decilitres and litres.
